Showing 1 to 3 of 3 items

Articles per Page: 25Page 1 of 1

This filters and settings usually help you to filter and search for articles in the table below. However, in this version these buttons are disabled.

The main navigation is in this version of the Inspector tool disabled. Usually, you can find here more statistics about your article forecasts

Click on the row of this table to inspect the results of the forecast run in the Article Forecast section of the main navigation. In this version you can only click on the article that you are supposed to plan according to your task instructions.

By hovering over the info-icons you can see tooltips that explain the related term.

Infoprovider Selection

- The Infoprovider section shows an overview table that contains all Infoproviders to which you have access and for which the forecasting run for the selected forecast version has been created
